Race director's bulletin 1

Clarification on the Full Course and safety car procedure : replacing

the text in Art 172

Double waved yellow flags will be shown at all marshal posts and the leader will be task to slow down to SC speed (70 to 90 km/Hr) on the Race Control channel. The Safety Car will dispatch in front of the leader. If the leader pits, the next car in line will have to keep that speed of the SC until it is in front of him. At the end of the procedure the SC will turn off its lights in turn 8 and slow down to 70 km/Hr prior to enter the pit lane.

When the SC enters in the pit lane, waved green flags will be presented on all marshal posts to inform the drivers that they will start racing when passing the line.

The leader must respect the max 90 km/Hr speed until the line.

ADAM Alain
